

Street Sweeping Procedure

The City of Mount Vernon will be implementing a street sweeping procedure in hopes that a complete cleaning of Mount Vernon streets can be accomplished after the winter seasons sand and debris. For residents, when your area of town is the designated area of town to be swept, the city would appreciate parking off the street to ensure the sweeper can have a clear and safe path to sweep the gutter line. Street sweeping will begin the week after the first brush collection. This year that date will be April 4, 2022.

Street sweeping will follow the same quadrant map that brush collection follows. The days will be a bit different however. Monday April 4th the city will start on the NW quadrant and spend two to three days in that quadrant, then move to the NE quadrant and spend the remainder of the first week there. The week of April 11th will be designated for the south side of town. Starting Monday April 11th sweeping will begin in the SW quadrant and take two to three days. Then sweeping will move to the SE quadrant for the remainder of the week. Thank you for your cooperation.
